

RITASH KOUL

A focused & goal-oriented professional, targeting assignments in **Software Development** with an organization of high repute'.

Mobile: +91-9797454878

E-Mail: koulritash@gmail.com

Profile Summary

- **Senior Developer** with **10+ years** of experience designing and developing enterprise desktop, web and backend applications using **C#, .NET, WPF, ASP.NET Core, and SQL Server**.
- Experienced in delivering scalable software solutions across **GIS, Financial Services, Insurance, and Healthcare domains**.
- Strong expertise in **desktop application development (WPF/MVVM), REST APIs, microservices, event-driven architectures, system integration, and enterprise application modernization**.
- Hands-on experience with **ArcGIS Pro SDK, Kafka, Docker, Kubernetes, Python (ArcPy), Azure DevOps**, and cloud-native technologies.
- Proven experience in **technical design, application architecture, legacy modernization, code reviews**, and building maintainable enterprise software solutions.
- Experienced in collaborating with cross-functional and globally distributed teams, mentoring developers, and delivering high-quality software using Agile methodologies.

Core Competencies

Software Design & Development
Agile / SAFe Methodologies
Code Reviews & Mentoring

Technical Architecture
Requirements Analysis
Root Cause Analysis & Production Support

Software Development Life Cycle
Performance Optimization
Unit Testing & Debugging

IT Skills

Programming Languages: C#, Python
Frameworks & Technologies: .NET Framework, .NET, WPF, MVVM, ASP.NET Core, WCF, ArcGIS Pro SDK, ArcPy
Messaging & Integration: REST APIs, Kafka, MQTT
Databases: SQL Server, PostgreSQL, Enterprise Geodatabase
Development Tools: Visual Studio, Azure DevOps, Git, Docker, Kubernetes, Prometheus, Grafana

Work Experience

Since Oct '2022 with Addnode Group as a Lead Software Developer

Project Title: Map and Planning

Period: Oct' 22 – Till now

Technologies Used: C#, .NET, WPF, ArcGIS Pro SDK, Python (ArcPy), SQL Server, REST APIs

Description: Modernization of **Gaida's** enterprise Mapping and Town Planning products on the **ArcGIS Pro** platform.

Role:

- Designed and developed **multiple ArcGIS Pro add-ins** from scratch using **C#, WPF, MVVM, and ArcGIS Pro SDK** as part of rebuilding the Mapping and Town Planning products used by more than 100 Swedish municipalities.
- Designed and implemented GIS tools leveraging ArcGIS Pro capabilities, including **mapping, editing, symbology, layouts, enterprise geodatabases, and geoprocessing**.
- Developed **Plugin Data Sources** to import various GIS formats as spatial features within ArcGIS Pro.
- Built **Geoprocessing (GP) tools** using **Python (ArcPy)** and developed **REST APIs** integrating with **Lantmäteriet** APIs and services, Sweden's national mapping and cadastral authority.
- Contributed to **application architecture, technical design, and code reviews**, ensuring scalable and maintainable enterprise GIS solutions.

Onsite Opportunity:

- Worked onsite at **Addnode's Sweden and Lithuania offices**, collaborating with distributed development teams on product development, technical design, and knowledge sharing.
- Attended the **ESRI Europe Developer Summit 2024** representing Addnode India to explore the latest ArcGIS Pro technologies and development best practices.

Dec'21 – Oct' 22 with Cognizant, Pune as a Senior Consultant

Project Title: FK VSS Suite

Period: Dec' 21 – Oct' 22

Technologies Used: C#, .NET, ASP.NET Core, WPF, SQL Server, PostgreSQL, Kafka, Mosquitto (MQTT), Docker, Kubernetes, Prometheus, Grafana, Grok Exporter, CI/CD

Description: Development of an enterprise IoT platform for medical infusion devices, focusing on device registration, communication, and monitoring.

Role:

- Led the development of the **Device Registration** module, mentoring a team of **2 developers** and driving the technical design and implementation of microservices and REST APIs.
- Designed and developed **microservices, background services, and REST APIs** for device registration, integrating **MQTT (Mosquitto)** for device communication and **Kafka** for asynchronous event processing across backend services.
- Established the initial **Kubernetes-based development environment** by designing and implementing a **Proof of Concept (PoC)** that containerized and integrated **Kafka, PostgreSQL, Mosquitto, Prometheus, Grafana, and Grok Exporter**, laying the foundation for the project's DevOps infrastructure.
- Collaborated with **Product Owners, Business Analysts, QA, and DevOps teams** to deliver scalable, reliable, and cloud-native solutions within project timelines.

Sep'21 – Nov' 21 with CoreView Systems, Pune as a Senior Software Engineer

Project Title: EDCMS

Period: Sep' 21 – Nov' 21

Technologies Used: C#, .NET, WPF, MVVM, SQL Server, REST APIs

Description: Development of an Electricity Customer Management System for customer information, billing, and service management.

Role:

- Developed responsive user interfaces using **WPF** and the **MVVM** architectural pattern.
- Implemented **background services** for automated billing, meter reading processing, and data synchronization.
- Development and integration of **REST APIs** for customer information, billing, and service request management.

Mar'17 – Sep'21 with S&P Global, Gurgaon as a Senior Software Developer

Project Title: Content Tool Suite (CTS), Transaction Data Pipeline & Ratio Dissection Engine

Period: Apr' 18 – Sep' 21

Technologies Used: C#, .NET Framework/.NET Core, WPF, MVVM, ASP.NET Web API, SQL Server, Kafka, Windows Services, Azure DevOps, Git

Description: Development and modernization of enterprise applications supporting S&P Global's **Mergers & Acquisitions** platform, including desktop applications, event-driven data pipelines, and financial calculation services.

Role:

- Developed the **Content Tool Suite (CTS)**, a **WPF desktop application** used by analysts to capture and manage complex Mergers & Acquisitions data, serving as the primary source for downstream S&P Global products.
- Developed the **Ratio Dissection Engine**, enabling users to visualize financial data calculation dependencies through an interactive tree structure while building backend services to process and calculate thousands of financial data items.
- Developed the **Transaction Data Pipeline** using **Kafka, Windows Services**, and reusable **NuGet-based domain models** to transform and synchronize M&A transaction data between S&P Global and SNL systems during the post-acquisition platform integration.
- Developed **event-driven backend services** that consumed **Change Data Capture (CDC)** events from **Attunity** via **Kafka**, enabling near real-time financial data calculations and synchronization across enterprise systems.
- Modernized the application stack by migrating **REST APIs** from **.NET Framework** to **.NET Core**, improving maintainability and performance.
- Collaborated with the **Release Engineering** team to design and implement **Azure DevOps CI/CD pipelines**, streamlining build and deployment processes.
- Participated in **technical design, Sprint Planning, Backlog Refinement**, and **production support**, collaborating with cross-functional teams to deliver scalable enterprise solutions.

Aug'14 – Mar'17 with Capgemini, Noida as a Software Developer

Project Title: NFOS (Nordic Front Office Situation)

Client: RSA Insurance Group

Period: Dec' 14 – Mar' 17

Technologies Used: C#, WPF, MVVM, WCF, SQL Server

Role:

- Developed and enhanced **WPF desktop application** screens using the **MVVM** pattern for insurance policy creation and management.
- Implemented business logic and integrated **WCF services** to process policy data and support backend operations.
- Worked with **SQL Server** to develop and maintain database objects supporting application functionality and reporting.
- Participated in **requirement analysis**, effort estimation, feature development, testing, and production support for change requests.
- Investigated and resolved **business-critical production issues**, collaborating with client teams through regular meetings and technical discussions.

Education

- **Bachelor of Engineering (B.E.) in Information Technology**
Thakur College of Engineering and Technology, University of Mumbai | **2014**

Personal Details

Languages Known: English, Hindi, and Kashmiri

Location: Pune, Maharashtra
